public...

SENATOR PIRSCH: Health clinics?

SENATOR BOHLKE: Right, to both offer it.

SENATOR PIRSCH: Uh huh. Okay. Thank you. I will vote for the amendment and listen further to debate.

SENATOR CONWAY PRESIDING

SENATOR CONWAY: Thank you, Senator Pirsch. We'll move to Senator Bohlke next, please.

SENATOR BOHLKE: Mr. Speaker, members, the only thing, one thing I did want to point out is I had named this my priority bill before knowing that this grant was going to be available. And originally it was just going to be a small pilot project when the Department of Health came to me and said that this grant was just recently made available and that because Senator Wesely and other people before me had this bill and then I picked it for my priority bill is the reason that we as a state, it's very timely for us. We can make application showing that we have a good plan in place. Thank you.

SENATOR CONWAY: Thank you, Senator Bohlke. Senator Robinson, you're next, please.

SENATOR ROBINSON: Mr. President, members of the body, Senator Wesely, I have a question.

SENATOR CONWAY: Senator Wesely.

SENATOR ROBINSON: I think it was Senator Wesely, I think in your last comments you said that this amendment may, may, that's what you said, may take care of all the expenses. Now, would you amplify that for me, please?

SENATOR WESELY: Well, the original bill had a \$2 million or so price tag. The committee amendment would have brought that down to about 200,000. This amendment would be that or less, and we're not certain at this point exactly how that might play out.

SENATOR ROBINSON: You're saying there's 200,000 of General Fund money?
